

Environment Policy

Enerlux Power Srl conceive environment management as a priority, following a system that is projected to the continuous improvement of environment performances and to the reduction of the impact on the environment.

To make its interest becoming concrete, in relation to ambient safeguard, Enerlux Power Srl is paying attention to the following fundamental principles:

- Assure the respect of legal prescriptions and of applicable regulations;
- Making, documenting and keeping active an environment management system in compliance to what foreseen from the standard UNI EN ISO 14001:2015 and awarding its certification by a certified organism;
- Promote participation and cooperation of all interested parts, knowing that to reach targets related to ambient protection, active contribution is decisive;
- Sending to customers and suppliers its own company philosophy related to environment respect;
- Optimize the use of natural resources.

Making such principles a practice, Enerlux Power Srl engages itself to reach the following targets:

1. Define responsibilities and procedures to assure a suitable management of direct or not direct ambient aspects related to its activity;
2. Promote activities to sensitize and train its workmanship carrying out their own jobs respecting company procedures to environment safeguard;
3. Assure systematic evaluation of environment performances through a steady monitoring with the aim to give elements to improve such performances;
4. Select suppliers able to assure products/services in compliance to Environment Management System;
5. Disclose and making known Environment Policy through the information stated on the web site that are periodically updated;
6. Manage production activities in a way to prevent and/or reduce impacts on the environment that could be related to it, paying particular attention to the waste produced and the risks connected to the use of polluting substances;
7. Using renewable energy produced from photovoltaic panels placed on the roof of Enerlux Power srl premise, to satisfy its own need of electrical energy;

Management of Enerlux Power Engages to make available resources, economical means and suitable competences for a correct operation of its own Environment Management System.
